

BOO-RIFIC

A Family Halloween Show

Its spooky not scary, it's just plain fun for kids of all ages, it's The Boo-rific Family Halloween Show.

Magic Don brings lots of great magic to this Halloween party. Things float in the air. Something vanishes! Then something appears! A silly skeleton just can't seem to get connected, but with some help from the kids it gets all put together in the right order.

A guy named "Frankie" loses his head because at Halloween he gets so excited about all the candy he forgets to tighten his neck bolts. "What are we going to do?" exclaims Magic Don. The kids and he decide that a balloon can be a replacement for the missing head. After drawing a face on the balloon and attaching it to Frankie's body, it just doesn't look right. Who wants to be called an airhead? The kids all say the magic words and... Blamm! The balloon pops and Frankie's head reappears!

Kids get to come on stage and dress up in a variety of silly costumes and masks while they're learning the rules for a safe Halloween. Visibility for the children through the mask and visibility of the kid's clothing in the dark or twilight are covered.

Safe candy eating, along with fire safety with costumes and jack-o-lanterns are also covered in a fun way that makes it memorable.

The show content and style can be adjusted to suit preschoolers through sixth grade. The underlying theme of the show for the younger children is learning that they don't have to be afraid of all the Halloween stuff. We show them that when we say you scared me it really should be you surprised me.

Older children and family shows have additional storytelling that builds until the "Big Boo". Almost everyone sees it coming and joins in the fun. At some sites we add a costume contest and have a great time parading around in our costumes.

At one point in every Halloween show there is a time that Magic Don puts on his troll mask and tells a troll story that has some magic and a self esteem message woven in for more meaningful fun.
