

# The Incredible Dinosaur Show

Dinosaurs are one of the most interesting puzzles that scientists continue to explore. Everyone seems to be fascinated with these animals that long ago wandered the earth. Dinosaurs continue to be a favorite of preschoolers, kindergarteners and elementary students. Kids and scientists agree that dinosaurs are **INCREDIBLE!**

The Incredible Dinosaur Show educates and entertains with lots of children participating on stage in the magic and silly stories.

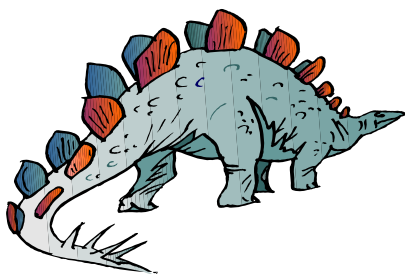

Kids learn that there were many differences in the various dinosaurs. In the story of the very hungry Tyrannosaurus, kids learn that there were plant eaters and meat eaters. Magically a skinny T Rex manages to get a meal and ends up with a big smile and a fat belly.

There's a dinosaur mystery story: **Just Where Did They Go?** There are lots of clues the children discover. But in the end our toy dinosaur disappears and nobody can find him.

The set for the show is a rocky outcropping with a sign welcoming everyone to the dinosaur town. The population on the sign at the end of the show magically has changed to zero.

During the show everyone meets a grouchy Velociraptor. He missed too much school because he was running around. There's a mini-dino dig and a fossil is found by a helper.

The Incredible Dinosaur Show is a great 45 minute show for preschoolers through the 4th grade.
