## A Show For Preschoolers

Opposites is a show designed to teach kids in a fun way about opposites. Magic Don's gentle humor, combined with lots of magic, stories and audience participation make this show the opposite of bad... it's good!

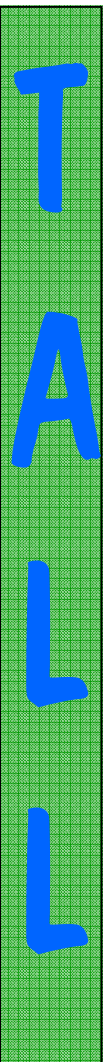

Kids see a light bulb that turns on even though it isn't plugged in but Magic Don doesn't see it. They go crazy telling him that the bulb is on. Finally the kids convince him to look and Magic Don is startled that the bulb is on and promises find out who did the magic.

There's a mini - play that kids dress up to do with Magic Don. It's about a clown in the circus who wasn't happy. He was sad. That was because his friend, another clown, was always silly and not serious. They finally get things worked out and the play has a happy ending.

Opposites is for the youngest of children, two year olds up to 2nd grade. Everything from up to down, bad to good is included in the show, but not every thing in between because it's all about opposites.
